

Citrix ICA Client Configuration for Macs

Client Installation

1. Download Citrix Online Plug-in-Web Version 11.2 client from GSA's Citrix downloads page, go to [_ \(https://gsa-apps.gsa.gov/downloads\)](https://gsa-apps.gsa.gov/downloads)

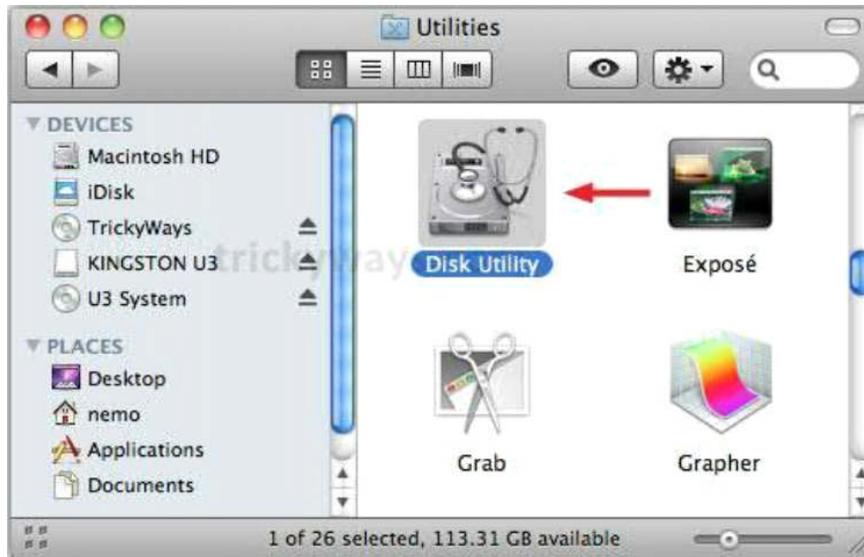

GSA Citrix Enterprise Support Downloads

Software	Platform	Version	Size	Download
Citrix Online plug-in	Windows 2000 / XP / Vista / 7 / 8	12.3	16.6 MB	↓
Citrix Online plug-in	Mac	11.2	18.5 MB	↓

Installation Instructions

- Users with GSA-issued equipment should use the DSM software catalog or call the helpdesk for installing the client
- To install this client you must have admin rights for your machine
- **Before installing this client you must uninstall any currently installed Citrix client from the control panel.**
- Download this client to a temp folder and double click the file.
- No user interaction is required for the installation
- You must reboot to complete the installation.

2. Click the Download Arrow and save the file to your Mac desktop.
3. Open the **MAC** hard drive and browse to the 'Applications\Utilities' folder.

4. Drag the download file from the desktop to the icon in the 'Utilities' folder labeled 'Disk Utility,' this step will mount the DMG file.

5. Go to the desktop and open the new mounted DMG hard drive icon, they will now see an ICA client/Citrix icon.

6. Double-click on the ICA client icon. It will install the Citrix client.

7. Visit <https://gsa-apps.gsa.gov> once the Citrix install is complete to access the GSA Citrix Farm.
